READ ALL INSTRUCTIONS CAREFULLY BEFORE INSTALLING. FAILURE TO DO SO MAY CAUSE PERSONAL INJURY OR DAMAGE TO PRODUCT AND/OR PROPERTY

- This installation guide is provided as a GENERAL installation guide; some vehicles vary and may require additional steps. We do not accept responsibility for third party labor charges or modifications. Exercise due-diligence when installing this product.
- We do not accept any responsibility for vehicle damage or personal injury resulting from the installation of this product.
- Careless installation and operation can result in equipment damage.

Requirements:

VOLVO CD CHANGER CONTROLLING RADIOS

Introduction

They are literally thousands of older Volvo vehicles on the road today with the original radio in place, but unfortunately lack support for many modern media formats many would love to have in their cars. Upgrading these radios to support Bluetooth is a great way to bridge the gap. The BT2-VOLHU supports streaming in addition to being able to track controls directly from radio buttons or steering wheel controls. Installation could not be simpler and only requires connecting module to the 8-pin CD changer socket on the back of the radio, pairing Bluetooth device and be on your way to enjoying music, navigation, audio books and other important applications from smartphone on the car system! Because this module uses the "CD" port, factory CD changer (if present) must be disconnected.

Installation

To install, user must gain access to the back of the radio.

1. Remove the cover panel in front of the gear selector lever by prizing it away with a plastic weatherstrip tool as illustrated in **Fig. 1**

Fig. 1

2. Move the gear selector lever as far back as possible.
3. Using a plastic weatherstrip tool; carefully prize away the gear selector lever cover panel together with the boot until the two clips release. Pull the panel up until the four clips at the sides release. (See **Fig. 2**)

Fig. 2

4. Rotate the panel to the left for better access (See **Fig. 3**)

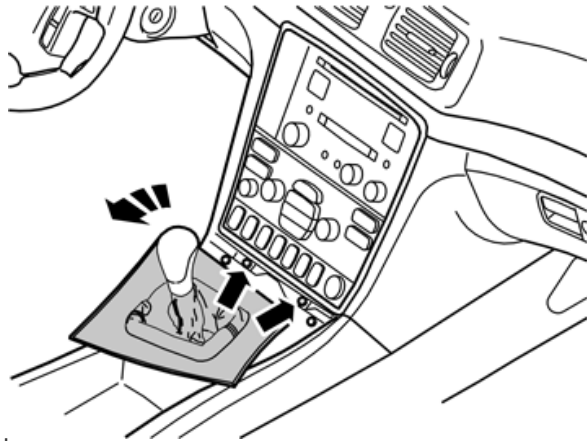

Fig. 3

5. Remove the (2) screws (Torx 25) holding the bracket with the radio and dashboard and climate control panel in the center console (See Fig. 4)

Fig 4

6. Angle the climate controls panel outwards so that it is possible to insert a couple of fingers between the center console and the short side of the climate control panel.
7. Pull the climate control panel downward maintaining the same angle and remove the climate control panel. The panel is well secured, so some force is required to detach the panel. (See Fig. 5)

Fig. 5

8. Unplug the connectors on the reverse of the climate control panel and place it to one side.
9. Remove (2) screws (Torx 25) from radio bracket. See Fig.6

Fig. 6.

10. Pull the radio bracket outwards at the lower edge, and pull the whole unit downwards.
11. Pull radio forward to gain access to the connector Fig. 7
12. Connect module 8-pin plug (See Fig. 8) to radio 8-pin "CD" port. (See Fig. 7)

Note!

If vehicle has a remote CD changer, it will need to be **disconnected** and will no longer function

Fig. 7

Fig. 8

Pairing

Pairing varies among devices but basic steps are the same. This process is done upon initial install and will not have to be repeated

1. Turn ignition and radio "ON"
2. From your Bluetooth enabled device, turn the Bluetooth ON and search for Bluetooth devices.
3. When a list of available Bluetooth devices appears on your Bluetooth device, select "DisCarSt" (See Fig. 9)
4. Confirmation "tone" is heard on car speakers.
5. The unit will automatically enter the BT Audio source and you can now start streaming audio from your Bluetooth enabled device.

Note: If the mobile phone doesn't support SSP (Simple Secure Pairing) Profile, please enter the pass code of "0000"

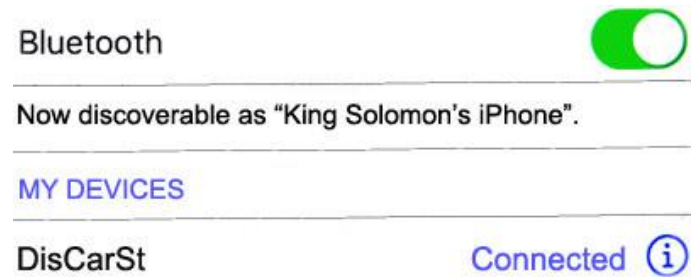

Fig. 9

Bluetooth operation

1. Press **Power/Volume** button to switch radio on
2. Turn **SOURCE** knob to select **CD-CHRG** mode (See Fig. 10)

Fig.10

3. Launch streaming application on smartphone device
4. Set device volume to at least 90%-- adjust as needed based on playback quality (reduce if distorted). Use radio volume knob to set playback level.
5. Press **SKIP** directional buttons for track control (**NEXT/PREVIOUS**) as seen in Fig. 11

Frequently asked questions & troubleshooting

1. **My vehicle has a CD changer. Will it still work?**
NO; Any remote CD changer, Aux or iPod adapter **must be disconnected and will no longer function.**
2. **Can I pair or save more than one device to the BT2-VOLHU?**
YES; more than one device (slaves) can be paired however only one connection can be active at a time.
3. **Can I use BT2-VOLHU to make/receive phone calls?**
NO; The BT2-VOL2 does not support Hands-free profile (HPF). Purchase our [BT6-VOLHU](#) instead.
4. **When streaming, will I be alerted of incoming calls?**
YES. Handset ringtone will sound (as usual). Answer call using handset or as you would in portable mode.
5. **Can I connect module to the CD changer plug in trunk/hatch?**
YES; If vehicle has original CD changer, the module can be connected to CD changer cable terminal in trunk/hatch. CD changer must be disconnected and will no longer function.
